

## Audubon Water Company

### CHANGE IN TREATMENT PROCESS PLANNED

AN IMPORTANT PART OF OUR SYSTEM MAINTANACE AND IMPROVEMENT PROGRAM. Audubon Water Company in the Level rd. area will be purchasing water from PA American Water Company. Consequently, the disinfection treatment process of the water will change from Audubon's free Chlorine to American's chloramine residual. Both are approved PA Department of Environmental Protection methods of disinfection. This change will help Audubon in the maintenance and improvement of the overall system. Audubon plans on this change beginning to transition on July 1st.
